Dear Sir/Madam:

I have been looking for opportunities to start my career and considered your offer as a perfect possibility to learn and develop, therefore I decided to apply.

My interest in programming started four years ago and I have been learning C++ since I started attending High School. I wanted to success in Polish Olympiad in Informatics so I studied algorithms and programming languages. After achieving my goal I decided to acquire knowledge about making websites and learned Python and Django framework. Now I am invloved in organising workshops and science camps for High School students, where I lead lectures and classes. I am sound in both oral and written English.

I hold a High School Diploma and study math and computer science at Wrocław University. I am ambitious, hard-working and can work in a group. I am skillfull in planning and analytical problems.

I believe I possess the necessary experience and qualification for this placement.

Thank you for the time you have taken to review my application.

Yours faithfully,

Mateusz Hazy
